03/06 ➔

Das Anhängermodul ist nicht diagnosefähig! Sollten herstellereigentliche Diagnoseprozesse bzw. softwaregestützte Prüfmechanismen Fehlerprotokolle generieren, welche direkt oder indirekt mit Anhängerbetrieb in Zusammenhang stehen, ist das Anhängermodul vom Leitungssatz für die Anhängersteckdose zu trennen und ein nochmaliger Diagnosevorgang zu starten!

The trailer module is not diagnostics-capable. If the manufacturer's diagnostics processes or software-supported test mechanisms generate error reports directly or indirectly linked with trailer operation, the trailer module must be disconnected from the leads to the trailer socket and a new diagnostic process initiated.

Le module remorque ne contient pas de fonction diagnostic! Au cas où des processus de diagnostic définis par le fabricant ou des mécanismes de contrôle assistés par ordinateur devaient générer des messages d'erreur directement ou indirectement en rapport avec le fonctionnement de la remorque, il est impératif pour la prise de remorque de détacher le module remorque du groupe électrique et d'initier une nouvelle procédure de diagnostic.

Il modulo del rimorchio non è idoneo alla diagnosi! Nel caso in cui processi diagnostici o apparecchiature di prova controllate da software dovessero generare dei protocolli d'errore in rapporto diretto o indiretto con l'uso del rimorchio, si deve staccare il modulo del rimorchio dal conduttore per la presa del rimorchio, e avviare nuovamente la diagnosi!
